Professional Summary

Computer Science student at UET Mardan with a strong interest in Artificial Intelligence, Machine Learning, and Python development. Experienced in data annotation using CVAT, AI-focused projects, and building Python applications with Streamlit. Seeking opportunities to apply and expand AI/ML skills through real-world projects and internships.

Education

Bachelor of Science in Computer Science

2024 – 2028

University of Engineering and Technology (UET), Mardan

CGPA: 2.62

Completed: 4th Semester

Technical Skills

Programming: Python, C, C++

Concepts: OOP, Data Structures Basics, Problem Solving

AI/ML: Machine Learning Basics, Data Preprocessing, Dataset Preparation

Data Annotation: CVAT, Bounding Boxes, Image Labeling

Frameworks/Tools: Streamlit, FastAPI, ReportLab, VS Code, Git

Experience

AI Intern

Zoobi Apps & Games Technology

- Worked on AI/ML dataset preparation and annotation tasks.
- Learned generative AI workflows and training data organization.
- Assisted in AI-related experimentation and data handling.

Software / AI Intern

AI Nova Apps

- Assisted in Python-based AI development tasks.
- Worked on data preprocessing and machine learning workflows.
- Supported testing and development of AI applications.

Projects

AI-Based Medical Discharge Summary Generator

- Developed a Streamlit application for generating medical discharge summaries.
- Automated PDF report generation using ReportLab.

AI Resume Analyzer

- Developed an AI-powered resume analysis application.
- Extracted skills, evaluated resumes, and provided recommendations.
- Applied NLP concepts for resume screening and matching.

AI Voice Analyzer App

- Developed an AI-based voice analysis application.
- Analyzed voice recordings for gender, age estimation, and emotional characteristics.
- Worked with audio datasets and speech-processing concepts.

Titanic Survival Prediction Web App

- Built a machine learning classification pipeline.
- Performed data cleaning, preprocessing, and feature engineering.
- Integrated FastAPI backend with Streamlit frontend.

CVAT Data Annotation Project

- Annotated image datasets using CVAT for machine learning training.
- Created bounding boxes and labeled datasets for computer vision tasks.

ATM Management System (C++ OOP)

- Developed a console-based ATM and banking system using OOP concepts.
- Implemented account management, deposits, withdrawals, and balance inquiry features.

Interests

Artificial Intelligence, Machine Learning, Data Science, Computer Vision, Speech Processing, Software Development

Languages

English, Urdu, Pashto
